

**ONE-TIME TRANSFERABLE LIMITED LIFETIME STRUCTURAL WARRANTY AND
15-YEAR SURFACE WARRANTY AGAINST OSMOTIC BLISTERING**

Keep This Information for Your Records

River Pools, located at 840 Commerce Parkway, Fortville, Indiana 46040, provides the above-titled warranty to the original purchaser of the pool and provides a one-time transfer to a subsequent owner.

STRUCTURAL. A pool purchased from River Pools is warranted not to leak due to structural failures caused by workmanship and material used in the manufacturing for the lifetime of the pool.

SURFACE. River Pools will warrant the surface of the pool from osmotic blistering for a period of FIFTEEN (15) years.

Water chemistry is extremely critical to maintain safe and healthy water and protect the surface finish of your pool. To protect the surface finish, you must always maintain proper water balance and chemical levels. Review the factors listed below and maintain the following levels:

Chlorine Residual - 1.0 to 3.0 ppm

pH Level - 7.2 to 7.6

Total Alkalinity - 80 to 120 ppm

Calcium Hardness - 150 to 200 ppm

Cyanuric Acid (chlorine stabilizer) - 30 to 50 ppm

Metals - 0 ppm

TDS - less than 1500 ppm (if salt system, maximum should be 1000 ppm above safe salt level)

Salt - 2700 to 3400 ppm (Only necessary if using a salt generator)

Langelier SI - Langelier Saturation Index (-0.3 to +0.3) Ideal is 0. (If you have a salt system, your saturation index should be between -0.2 to 0.2 to account for the additional corrosive characteristics of salt)

This list is not a conclusive list of chemicals that affect water chemistry.
